## VIDEO

**Getac**

Getac Video offers a complete solution including both in-car video and body worn cameras, combined with a robust back end evidence management system.

### In-Car Video

In-car video brings a powerful windows based DVR with both on-premise and cloud backup options to departments. In addition, Getac Video has powerful industry leading redaction software.

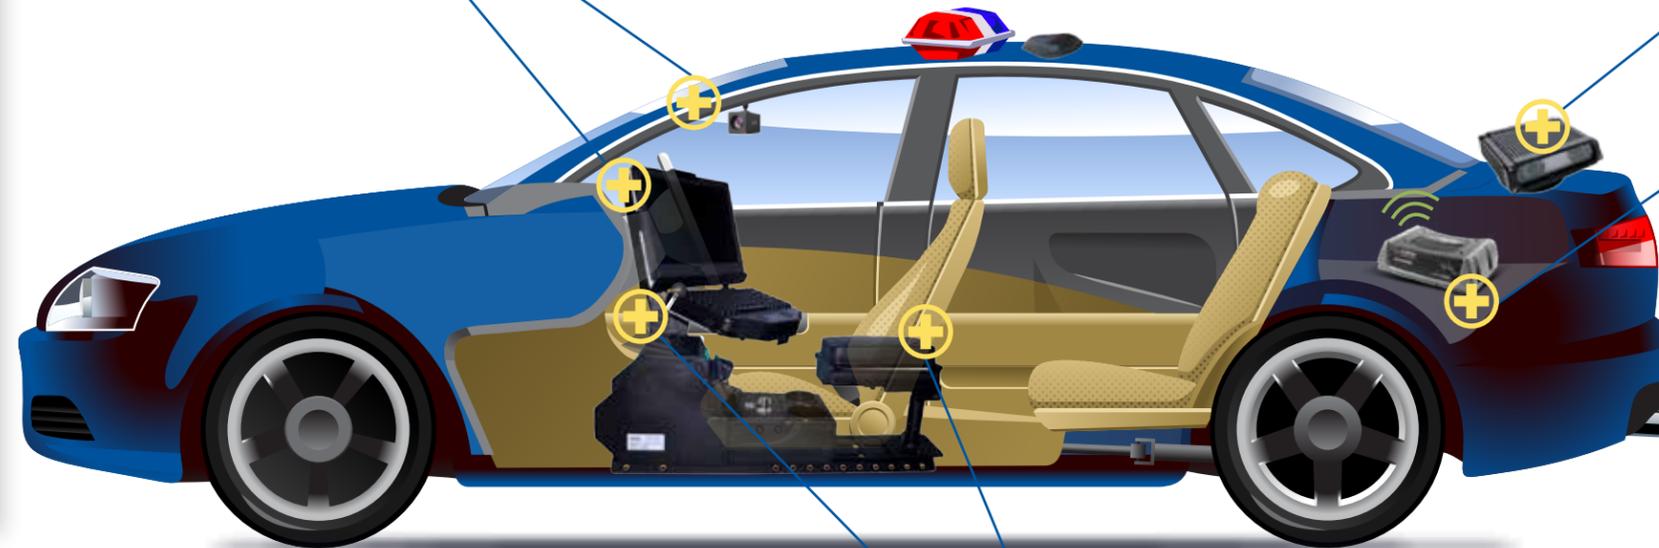

### Body-Worn Camera

The body-worn camera delivers panoramic, full HD video even in low-light conditions, a small and light form factor, up to 12 hours battery life and a wide range of communication features.

## LICENSE PLATE READERS

Mobile or fixed license plate recognition (LPR) cameras take photos of license plates capturing date, time and GPS coordinates of where the photo was taken.

## COMMUNICATION

AVL Solutions

### Connectivity Products

For both productivity and safety, departments need reliable connectivity for workers and assets through Band 14 and FirstNet. Brite partners with top technology providers to ensure devices, people and vehicles remain connected to critical resources and necessary information.

## MOUNTING

Brite delivers innovative, industry proven mounting options. We specialize in ensuring departments meet their goals of officer safety, ergonomic computing environments and reducing the total footprint of all vehicle configurations.

## E-TICKETING

Break free of paper records with e-ticketing. Brite offers multiple printer and scanners models for a customizable solution to meet an agencies' needs.

# Intel Center

Intelligence tools to help solve crimes and make informed decisions.

## INVESTIGATIVE PLATFORM

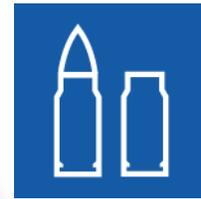

Vigilant Solutions investigative platform provides actionable intelligence to develop more leads and solve more crimes effectively and efficiently. Vigilant combines the largest national database and superior camera technology with advanced analytics to provide comprehensive plate, facial and ballistic search capabilities.

PLATE SEARCH

FACIAL SEARCH

BALLISTIC SEARCH

## VIDEO ANALYTICS

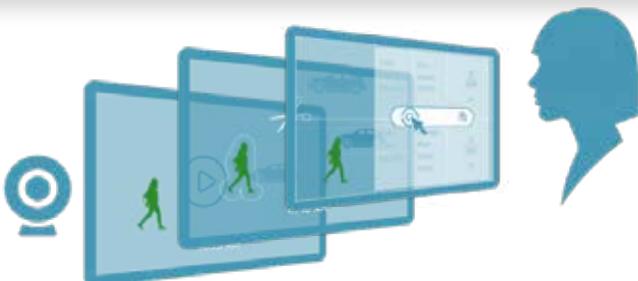

Leverage existing video assets and save resources by analyzing hours of video in minutes. BriefCam cuts out the noise through advanced filtering and focuses on the target to solve crimes faster.

## VISUAL OPERATIONS

Live Earth delivers real-time situational awareness to help organizations make time-critical, data-driven decisions by leveraging information from disparate sources.

# IT Services

Evaluations, deployments, support and management of IT solutions.

*"When Lorain County was looking for a county-wide Automated Vehicle Location System I suggested that they contact Brite for their experience and expertise. Having previously worked with Brite, I was impressed with [their] expertise and professionalism and have enjoyed working with them. Brite's personnel are always responsive and stand behind their products and services.*

*I have, and will continue to recommend Brite Computers for not only their AVLS system, but their line of Fujitsu MDT and tablet products as well."*

*- Chief Joseph K. Kucirek, Amherst Police Department*

BriteDeploy is a comprehensive service designed to take the unnecessary hassle and expense out of deployments.

Every department has particular deployment needs and expectations. Brite understands this and created a highly customizable service rooted in a proven discovery method. Now, a department can receive the exact service required, when they require it.

# Cyber Security

Essential defense against today's cyber security warfare.

Brite's comprehensive security package leverages our enterprise cyber security expertise to protect public safety agencies against today's cyber criminals.

By partnering with industry leading cyber security manufacturers, Brite cuts through the clutter and advises departments on the best tools for their unique needs.

## ENTERPRISE BACKUP

Disasters happen, attacks are inevitable. Reliable backup solutions for public safety agencies were previously expensive and difficult to maintain. Get departments up and running immediately with enterprise grade backup and data protection.

## NEXT GENERATION ENDPOINT

In today's cyber-security environment, a firewall alone will not cut it. Next generation endpoint solutions are easy to deploy, manage and are essential to protect departments at every point of entry.

## ZERO-DAY PREVENTION

With greater than 80% of all malware categorized as unknown, signature based anti-virus is ineffective. Brite's zero-day prevention solutions protect departments against the latest threats, no matter what the category.

## SECURE COMMUNICATION

For a mobile workforce, a secure and reliable line of communication is critical. Brite secures the communication to ensure maximum up-time, critical performance and necessary protection.

## MULTI-FACTOR AUTHENTICATION

CJIS requires multiple forms of authentication for public safety agencies' mission critical data. Brite's multi-factor solutions are easy to use, provide flexibility and ensures only authorized access to data.
